Information for the trainers

1. Please rate your skill level with the use of your primary front-end development platform/technology (This will help us calibrate the materials for the workshop according to your requirement):
   a. I don't work on front-end development
   b. I work with a team doing front-end development but am not directly responsible for coding.
   c. I sometimes do front-end development of low to mild complexity.
   d. I do large scale front-end coding work on projects in my organization and am an experienced front-end developer.

2. What front-end platforms/technologies do you primarily use in your development work. Please choose all that apply:
   a. Plain HTMl and DHTML.
   b. Microsoft Web platform - asp, asp.net, AJAX, silverlight
   c. Microsoft desktop applications - winforms, WPF
   d. Java Web platform - JSP, JSF, DOJO, Backbase, Google toolkit, etc.
   e. Java desktop applications - swing and others
   f. Php
   g. Ruby
   h. flash and flex (with or without java)
   i. others: please specify

3. What development tools/IDE do you use in your daily development work:
   a. MS Visual studio
   b. Eclipse for php, java ruby etc.
   c. others: please specify

4. Please rate your skill level with the use of CSS to format Web pages:
   a. no knowledge
   b. beginner
   c. intermediate
   d. expert

5. Will you be comfortable writing code for a small 2-3 page Web application before coming for the workshop?
   a. Yes
   b. No

6. Which of the following correctly captures your expectation from this workshop?
   a. I expect to get and overview and awareness about accessibility issues in Web applications and the methods that can be used to address them.
   b. I expect to get hands on practice on specific coding techniques for solving accessibility related problems in Web applications.
   c. I expect to understand the legal implications, if any, of accessibility of Web applications.
   d. I expect to conceptually understand the W3C guidelines on Web accessibility and pass on that knowledge to others in my organization who will actually implement them.
   e. Others: please specify

7. Do you use a CMS for developing and designing your web site? If yes which of the following?
   a. Plone
   b. Drupal
   c. Joomla
   d. others (please specify)

8. Have you ever tested or got tested the web pages you design for accessibility? If yes with which screen reader or other device.
   a. orca
   b. Linux Screen reader (LSR)
   c. jaws   d. others (please specify)
